DUAL-LAYER FF BLAST™ PLUS

The double layered FF BLAST™ PLUS midsole delivers a lightweight and energetic ride, working in harmony with the PEBAX® plate for enhanced speed.

IMPROVED WOVEN UPPER

This woven upper reduces the shoe's weight while increasing durability against abrasions from rocks and roots.

PEBAX® PLATE

The PEBAX® plate is placed strategically between two layers of foam for flexible propulsion and provides extra speed during trail runs.

ASICSGRIP™

The ASICSGRIP™ technology on the outsole provides high grip and is combined with an uphill and downhill lug pattern for improved agility.

FUJISPEED™ 4

Great propulsion

The new FUJISPEED™ 4 comes with a PEBAX® plate, sandwiched between two layers of FF BLAST™ PLUS.

Amazing grip

The ASICSGRIP™ technology on the outsole allows for easy navigation on varying topography, providing the necessary support on the trails.

Durable performance

The woven mesh provides the necessary durability on technical trails, allowing for a comfortable performance throughout.
